

## RN nomination

# Barb Kathol

## Calgary

Barb has had years of experience in leadership roles from the unit to the system level. She is currently the Chief Operating Officer of Carewest and serves on the board of directors for the Mosaic Primary Care Network, supporting teams and organizations with diverse concerns.

Key nursing priorities for her include the growing nursing shortage, the psychological well-being of nurses, and how AAN can continue to be a unified platform for nurses to learn, be inspired, and advocate for nursing in our health system.

*"People feel valued and respected when they are heard, asked to participate, and see their perspectives and contributions reflected in the organization...intentionally seeking out LPNs, RPNs and NPs for their input will help not only ensure AAN has a balanced and multidimensional understanding of issues and perspectives, but also help create an organization where all nurses feel valued and respected."*
